Your Cataract Surgery Checklist

Blue Fin Vision®

Take this to your appointment. Tick each question once it has been answered, and note the answer.

Name _____ Appointment date _____

YOUR EYE

- [ ] Is anything other than cataract likely to limit my vision after surgery?

YOUR LENS

- [ ] Will my lens be set for distance or near, and why?
- [ ] Am I short-sighted, and would near focus suit me?
- [ ] Have I worn monovision in contact lenses before, and do I know my distance eye?
- [ ] Are there other lens options suitable for my eyes that are not offered here?

YOUR ASTIGMATISM

- [ ] How much astigmatism do I have, and is it regular?
- [ ] Has corneal topography been done?
- [ ] Will it be corrected with a toric lens? If not, why not? If so, how will it be aligned?

YOUR SURGEON

- [ ] Who will operate, and will I meet them first?
- [ ] Will a doctor in training carry out any part of my surgery, and what are the arrangements if I would prefer they did not?
- [ ] Where will my follow-up be, and who do I call if there is a problem?

YOUR CHOICES

- [ ] Have all reasonable options for my eyes been explained, including suitable ones not available here?
- [ ] Does a named surgeon, wider lens choice or astigmatism correction matter enough to me to consider going private?

Prepared by Mr Mfazo Hove, Consultant Ophthalmic Surgeon. This checklist supports, and does not replace, your consultation.
